

Bids and Tenders | Take control of the proposal process

The advanced, web-based Bids and Tenders system from eSolutionsGroup allows you to promote, manage and distribute online documents. For improved efficiency, self-serve and online purchasing capabilities are available to your prospective vendors.

Bid and Tenders Features

Usability

- Browse through summaries of bids, tenders and other documents
- View and filter information by criteria from a drop-down list
- Searchable by status and keyword

Registration

In order to purchase and download documents, users register by creating a new account.

- Option to receive specific notifications, including new bid items under selected categories of interest
- Verify information to sign in and place bids
- Password retrieval: enter a valid email address to which the account information can be sent

Online Purchasing

- Make payment by credit card through a secure, online shopping cart
- Automatic notification of addendums by email, which are available at no charge
- Administrative management of payments and tracking for bids

Email Notifications

Registered users will receive email notifications whenever:

- New tenders aligning with selected interests are posted
- New documents, such as addendums, are posted for registered tenders
- Tender status changes
- Bids are successful/unsuccessful

Administration

Your staff has the ability to:

- Create and manage tenders, setting category, price, and if hard copies are available to be picked up. Staff can change the status of a document as needed.
- Create users lists and bid summaries for selected documents, with bid amounts for each tender, once tenders are awarded. The option to hide selected items from the public or omit members from the publishing list is available.
- Add and manage addendums for documents in PDF format. Bidders receive automatic notifications.
- Manage and modify user account information; add and remove accounts.
