

## Provide notification of new content and news; drive traffic back to your i:Create website with an easy to use RSS module

Syndicate your website and reach a larger audience through an RSS (Really Simple Syndication) feed that sends out automatic notification of new site content.

Designed exclusively for the eSolutions content management platform, i:Create RSS brings true interactivity to your website.

## i:Create RSS Features

### RSS Manager Module

- RSS Manager Module allows i:Create users to manage RSS feeds from their websites
- Easily add new articles to the feed when releasing a page in i:Create
- Entering article title and description is straightforward
- i:Create automatically updates the feed file when the page is released
- RSS/Feed link allows visitors to add the feed to their reader
- RSS readers monitor your i:Create RSS feed and alert subscribers when new articles are added

### Hosting

The i:Create RSS module is peered to our i:Create website CMS and is hosted in our Secure Data Centre. With 99.9995% uptime and N+1 redundancy, the system is equipped to ensure the integrity of your website, including:

- Full backup power conditioning
- Full security
- Advanced fire suppression
- Climate control
- Customer control and visibility
- Scalable infrastructure
- 24 x 365 monitoring
- Fibre-based connectivity
