

Mobile Safety Inspection & Reporting Tool

- Standardize in-field reporting
- Reduce administration time and free up in-field resources
- Quickly sort, search and analyze regional reports

eSolutionsGroup's new Mobile Safety Inspection & Reporting Tool provides faster, more accurate tracking of safety and maintenance issues in the field by enabling inspectors to record issues onsite without paper forms.

Using a mobile Windows device or your browser, the Mobile Safety Inspection & Reporting Tool can be securely synchronized from anywhere that inspectors have internet access.

Using a web tool, health and safety staff and facility administrators can review inspection results and log the corrective actions taken to address issues or hazards identified during the inspection.

From school or facility inspections, to job site safety evaluations, no paper means less time for administration, more time for more inspections, and easier and powerful data analysis and trends reporting.

Reduce Administration; Spend More Time In the Field

- Save time and eliminate errors caused by poor handwriting or incomplete fields
- Save costs by reducing printed forms and minimizing processing time

Cut Processing Costs With Integrated Reporting

- User friendly icons and easy-enter data fields
- A powerful search function allows the administrator to search within a report, or when exported across multiple reports

Faster, Accurate Reporting with a Simple Interface

- Multiple inspectors and multiple facilities with secure, individual sign-in
- Identify hazards, note specifics and rank risks
 - Standard fields include: Inspector, Location, Hazard Type, Observed Hazard, Rating (level of risk), and Comments

Export to Easily Compile Multiple Reports from Multiple Sources

- Manage data for powerful trends analysis
- Track and report historical data – by location, hazard type, dates, inspector

Customize to Your Needs

- Brand to your organization or department
- Use standard fields or customize to your industry or organization needs for an additional fee

Save the Environment; Go Green

- Online forms and reports reduce paper to save the environment

At eSolutionsGroup Ltd., we unite innovative, web-based technologies with creative and consulting services to help businesses grow. Together, we build marketing and communication strategies for customers across North America. Then eSolutionsGroup turns those strategies into concrete results through custom applications, technology and data services, and award-winning website, interactive multimedia and print design.
