

Combine effective and compelling online education with the ability to easily administer courses and training at an enterprise level

Empowering staff to advance their careers leads to job satisfaction and improves performance. i:Learn's online courses help maintain productivity and allow you to track employee progress.

Managers and Human Resources staff receive real-time notification of course completion, making learning management straightforward and easy.

i:Learn Features

Key User Advantages

- Flexible, web-based application
- Easy course management and tracking
- Multimedia enabled and SCORM compatible

Features

- Multi-input learning (see, hear, do)
- Paced learning
- Unique exercises, quizzes and tests
- Total learning management system
- Customized media-rich content
- Enterprise-wide administration for multiple courses
- Easy data collection and reporting
- Real-time email notification
- Online help
- Secure access interface

Multi "Input" Learning (See, Hear, Do)

By developing customized, media rich content for each course, the learning environment is interesting and the presentation methods take into account all learning styles.

Paced Learning

Content is organized logically into sections and sub-sections. The student is able to go through the presentation and complete the quizzes and exercises only in the order developed by the instructor. Sections cannot be skipped or bypassed.

Unique Exercises, Quizzes & Tests

Interactive exercises and quizzes allow student participation and learning reinforcement through review. Final test questions are randomized to prevent student collaboration.

Technology

- Cross-platform and cross browser delivery
- Multi-media capabilities
- Small file size
- Small plug-in size allows faster downloads
- Fast development process
- Easy integration with leading web technologies

Hosting

i:Learn is hosted in our Secure Data Centre. With 99.995% uptime and N+1 redundancy, the system is equipped to ensure the integrity of your website, including:

- Full backup power conditioning
- Full security, 24 x 365 monitoring
- Advanced fire suppression
- Climate control
- Customer control and visibility
- Fibre-based connectivity
- Option to deploy on-site
